

## Historic station data

### Select a location from the map or from the list below

Blue dots indicate stations which are now closed.

### The data consist of:

- Mean maximum temperature (tmax)
- Mean minimum temperature (tmin)
- Days of air frost (af)
- Total rainfall (rain)
- Total sunshine duration (sun)

Missing data (more than two days missing in a month) have been indicated by "---".

Estimated data (where available) have been indicated by "\*" after the value.

Sunshine data using a Kipp and Zonen sensor have been indicated by a "#" after the value. All other sunshine data have been recorded using a Campbell-Stokes recorder.

### Notes

No allowances have been made for small site changes and developments in instrumentation.

Data is indicated as provisional until the full network and quality control has been carried out.

Data and statistics for other stations, and associated charges, can be obtained by contacting our [Customer Centre](#).
